HSC NORD

CUTTING-EDGE. COST-EFFECTIVE. EASY -TO-IMPLEMENT.

HSC eLEARNING SOLUTION.

The compliance game-changer.

My Portal
POWERED BY HSCITAS

HSC LEARNING.

DIGITAL SOLUTIONS TO TRANSFORM BUSINESSES.

Welcome to HSC eLearning, future-proof software for implementing safety- and company-specific employee training programs.

The HSC eLearning system within MyPortal automates your regulatory framework in matters of health and safety. Our modular platform in an interactive format brings a thorough but simple-to-use eLearning plan that benefits all of your employees. A clean design and handy features guarantee a pleasant user experience. Moreover, eLearning instructions can be tailored to your specific requirements, including a full scope of employee training manuals.

HSC made it simple!

> This next-level eLearning solution reduces the time and expense of instruction implementation. The course ends with a multiple-choice test and certificate issuance. Additionally, a web-based software solution tracks and monitors employees' progress.

HSC Nord leads the way in delivering interactive content and an outstanding user experience across industries.

2 MILLION +
Instructions Completed

HSC Nord GmbH is Germany's first and only company to, entirely in-house, develop an eLearning platform with all essential health & safety content. Compliance and regulatory professionals who designed eLearning have decades of combined expertise.

eLearning Features

✓ Legally required instructions

✓ A steady stream of new features

✓ Suitable for businesses across numerous industries

✓ Unique personalization options

✓ Managing visitors and employees without a business email address

✓ Simple completion tracking

✓ Certificates

✓ Multilingualism

✓ Data security and storage

EMPLOYEE ONBOARDING.
PERSONALIZED EMPLOYEE SOLUTIONS.

USERS & GROUPS. IMPORT.

Thanks to these sections, participants in online instruction can be easily onboarded. The **USERS** section stores important employee details such as personal data, modules assigned, and the business area or service group a participant belongs to. Additionally, information on whether the participant is an employee, service provider, visitor, or external temporary worker is ensured. All data is securely stored in the cloud and is unaffected by hardware failure.

Add your employees to relevant **GROUPS** and immediately provide them with all necessary safety-related information. Groups can be formed based on a business area, such as a branch office, or services, such as desk or field workers, drivers, and similar. Furthermore, getting non-desk employees on board is no longer a challenge. It is possible to manage visitors and employees without a business email address.

Thanks to the **IMPORT** section, you can import/update the participant's list using Excel file, you can download template files for preview or you can export files with current eLearning users.

Enjoy the advantage of intuitive navigation for adding new eLearning users and sending access data while keeping track of the number of users and modules assigned.

# LEGALLY REQUIRED INSTRUCTIONS. RELEVANT COMPLIANCE CONTENT.

DOCUMENTS & SETINGS

Inside the **DOCUMENTS** section, you can store files for online instruction participants to see. There is a segment for required legal documents. HSC frequently upgrades them to reflect legislative changes and user preferences. Furthermore, we tailor a relevant selection of mandatory modules to your company's needs.

An additional segment can store company-specific files written according to the details of your enterprise's core activity. These employee training modules and product manuals can also be marked as required.

Now you can provide your employees with all the mandatory product or safety manuals they require from day one. Inside the **SETTINGS** section, relevant modules can be selected and assigned while sending emails regarding notifications, reminders, and access data.

Individually configured mandatory modules

Additional sector-specific content

Comprehensive documentation

Fulfillment of entrepreneurial duties

Employee training

CONTROLLING.
COMPREHENSIVE & TRUSTWORTHY.

STATISTIC & REPORTING

The **STATISTIC** section delivers insight into eLearning participants' progress and module statistics. Significant business data is evaluated by the software and presented in charts. Operating figures regarding finished modules and successful participants are crucial information sources and indicators for further governance. You can always see where your company stands regarding compliance and where you might need to make changes to ensure the fulfillment of legal duties. In this way, you may also check how each employee, branch office, location, and service group contributes to the overall success.

Thanks to the **REPORTING** section, you can assign and manage the recipients of the statistical reports. The software automates the email notification and reminder processes while using three escalation levels. Levels can be precisely adjusted according to the duration of the module completion postponement. Depending on the amount of delay, the report goes hierarchically to the appropriate manager.

eLearning Highlights

- CLOUD-BASED
- LEGALLY SECURE
- INDUSTRY-SPECIFIC
- REGULARLY UPDATED
- SCALABLE
- CUSTOMIZABLE

ORGANIZED PAPERWORK.
EFFECTIVE TRAINING PROCESS.

CERTIFICATE.

With HSC eLearning, you can act in a legally compliant manner, increase efficiency, and reduce time spent on paperwork and training. Your employees may easily complete all the necessary safety or product-related modules while adhering to the legal standards for thorough and timely documentation. Most importantly, an intuitive interface will help employees complete tasks independently on their devices. Take comfort in knowing that all certificates have been completed and organized automatically inside the **CERTIFICATE** section.
